MEMORANDUM FOR: Dr. Charles H. Reichardt
Director of Intelligence
Atomic Energy Commission
Washington, D. C.

SUBJECT : Career Development Course

1. As part of a program directed toward the long term career development of a group of carefully selected employees, the Directorate of Science and Technology is continuing the broad course of training started last year. For a thorough understanding of the nuclear energy field and related intelligence analyses, I would like, as last year, to have this group of twelve individuals visit Oak Ridge and the Nevada Test Site. The group has a "Q" clearance. I would like to request any special sigma clearances that may be necessary to accomplish our objectives at these facilities.

2. The following activities or installations are particularly requested to be included in these visits:

Oak Ridge

Gaseous Diffusion Plant, K-25
Ultracentrifuge Pilot Plant, K-25
Weapons Fabrication Facilities, Y-12

Nevada Test Site

Underground Test Facilities
Nuclear Rocket Development Program

3. I propose the following dates for these visits: Oak Ridge on Monday, 29 April 1968 and Nevada Test Site on Wednesday, 1 May 1968. A list of CIA participants for this trip is attached. Security arrangements will be made by [redacted] Chief, Security Management Staff, DD/S&T. 25X1

4. We are hopeful that these proposed visits to AEC facilities will be agreeable to your Office and the AEC, and I would greatly appreciate your assistance in making the necessary arrangements.
